

Sub
Cf
B₁

1. Cosmetic or dermatological preparations, which are finely dispersed oil-in-water or water-in-oil systems, comprising

- (i) an oil phase,
- (ii) an aqueous phase,
- (iii) boron nitride which has both hydrophilic and lipophilic properties and is dispersible both in water and in oil, and
- (iv) at most 0.5% by weight of one or more emulsifiers.

Please substitute claims 5 and 6 with amended claims 5 and 6:

Sub
Cf

5. Preparations according to Claim 1, characterized in that the average particle diameter of the boron nitride particles used is less than 20 μm .

B₂

6. Preparations according to Claim 1, characterized in that, in addition to boron nitride, further pigments are present, which are selected from the group consisting of modified polysaccharides; microfine polymer particles; micronized, inorganic pigments; and mixtures thereof.

✓
Please add new claims 9 - 11:

Sub
Cf

9. Preparations according to Claim 5, characterized in that the average particle diameter of the boron nitride particles used is less than 15 μm .

B₃

10. Preparations according to Claim 6, characterized in that the micronized, inorganic pigments are amphiphilic metal oxides.

11. Preparations according to Claim 10, characterized in that the amphiphilic metal oxides are selected from the group consisting of titanium dioxide, zinc oxide, iron oxides or mixed iron oxides, silicon dioxide, silicates and mixtures thereof.
